

# Why almost half of pregnancies are unintended?

I don't believe in doing anything to stop from having children

It wasn't my fertile time

I wasn't expecting to have sex

I might not be able to get pregnant later if I use birth control now

My boyfriend doesn't like using condoms

I can't get pregnant the first time I have sex

I was using birth control

My doctor said I couldn't get pregnant

We used condoms every time except one time!
