FEDERAL OBJECTIVES

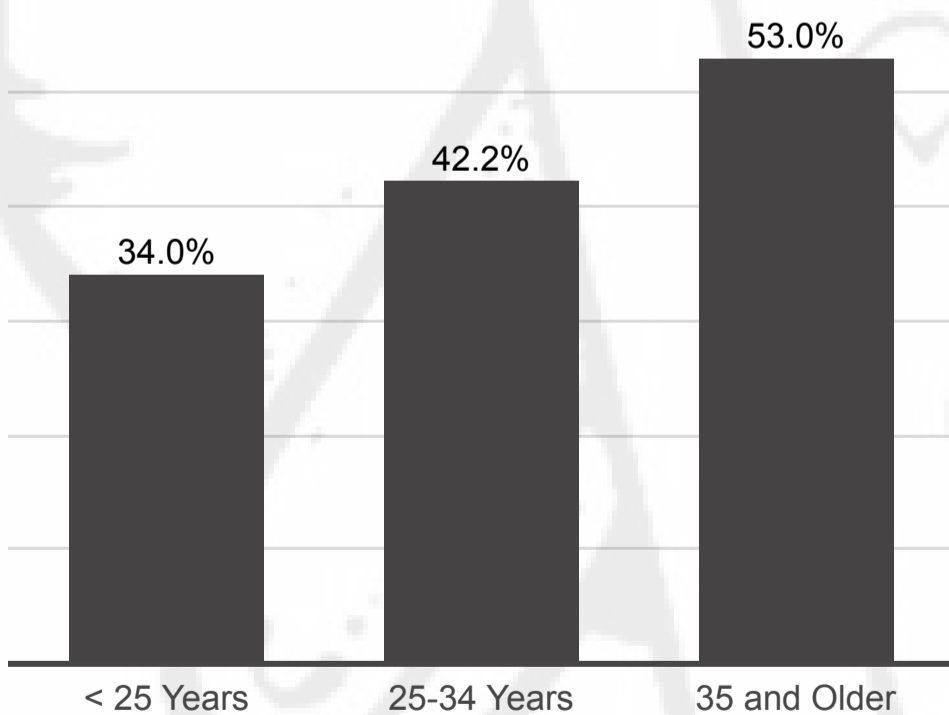

Increase access to comprehensive oral health care for MCH populations most at risk for oral disease.

One in four women of childbearing age have untreated cavities. Children from mothers with poor oral health develop tooth decay at a higher rate with one in five affected in early childhood.

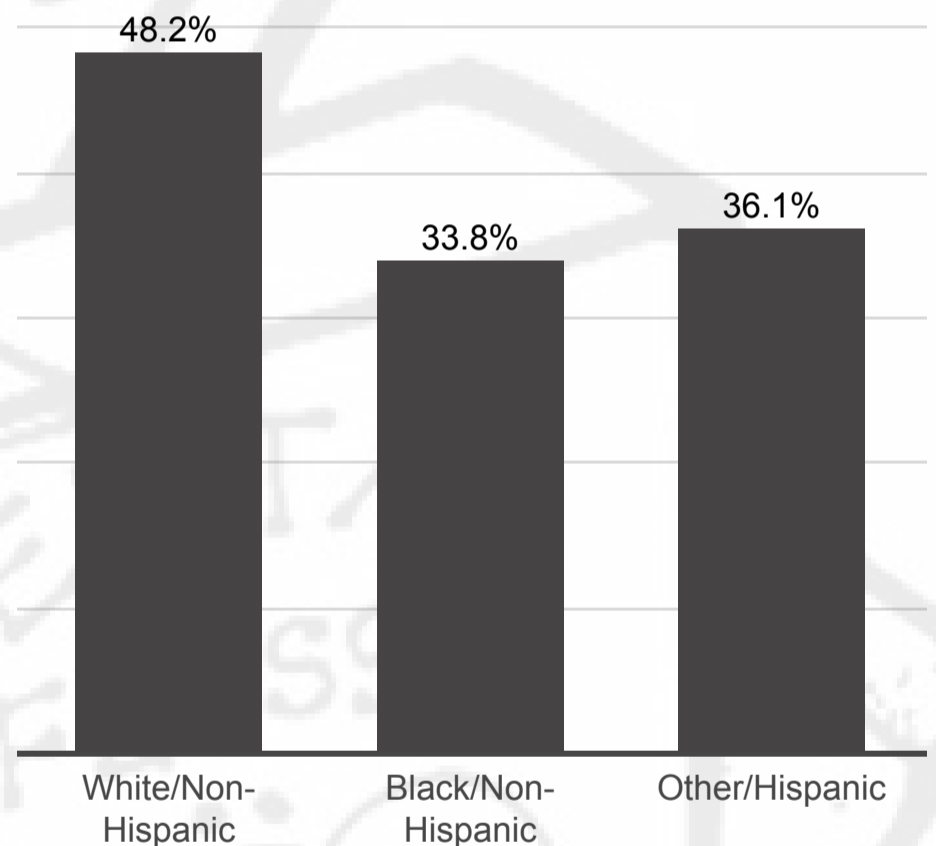

HOW ARE WE DOING?

66.2 % of Delaware's Black/Non-Hispanic pregnant women and 63.9% of Delaware's Other/ Hispanic pregnant women did not have a preventive dental visit in the past year. This is compared to 51.8% of Delaware's White/Non-Hispanic pregnant women.
