INCREASE HEALTHY LIFESTYLE BEHAVIORS (HEALTHY EATING AND PHYSICAL ACTIVITY)

Physical activity in adolescents reduces the risk of early life risk factors for cardiovascular disease, hypertension, type II diabetes, and osteoporosis.

DELAWARE'S COMMUNITY VOICE

"Roles with wives and partners were shared when it comes to safe play and physical activity. However, the majority of fathers felt they had the greatest input in regard to physical activity."

“

According to the Centers for Disease Control and Prevention (CDC), children and adolescents need one hour or more of physical activity each day, for five or more days a week.
